

NOACA Air Quality Public Advisory Task Force

Work Groups - PM_{2.5} SIP Development

Mobile Sources

Work will include, at a minimum:

- On-road vehicles (cars, trucks, buses, motorcycles), including diesel solutions and alternative fuels
- Off-road vehicles, including construction equipment and agricultural equipment
- Railroads, including switchyards

Stationary Sources

Work will include, at a minimum:

- Energy conservation
- Large sources, including electric generating units and steel mills
- Small sources, including commercial cooking
- Residential fuel combustion, including wood stoves and diesel generators
- Open burning

Sign-up sheets for participation on these two Work Groups will circulate during the Task Force meeting on October 26, 2006.

Participation is open to both Task Force Members and to Interested Observers.
