### ● Comments:

The purpose of this correspondence is to inform you of a technical amendment to NOACA's SFY 2012 – 2015 Transportation Improvement Program (TIP), involving the following projects:

**D12 TSG FY2013 (ODOT District 12 Signal Contract): PID No. 88276** – This project is listed on page 37 of the TIP with State funds. The project involves upgrading signals at the following locations in the City of Cleveland: 1) CUY US 422 - 0.27 (Ontario Street and Huron Road); 2) CUY US 42 - 16.35 (West 25<sup>th</sup> Street and Clark Avenue); 3) CUY SR 43 - 11.13 (Miles Avenue and Lee Road); and 4) CUY SR 17 - 10.78 (Brookpark Road and State Road). Federal funding has been added to the project and the cost has increased over the allowable maximum from \$275,000 to \$495,000. The project has a sale date of March 28, 2013.

**CUY IR 271 - 00.00: PID No. 80418** – This project is listed on page 86 of the TIP. This project involves adding one (1) lane in each direction along IR 271, from IR 480 at the Summit County Line to IR 480 at Columbus Road. The work includes replacing the existing pavement from the Summit County Line to approximately Miles Road. The north terminus of the project's pavement replacement has been changed from Emery Road (as listed in the TIP) to Miles Road. Also, the project's construction cost has increased from \$100,870,000 to \$129,471,000. Funding for the preliminary engineering detailed design (PEDD) will be encumbered in SFY 2013.

**CUY IR 490 - 00.41: PID No. 24855** – This project is listed on page 93 of the TIP. The project involves concrete repairs to IR-490, from the West 11th Street pedestrian bridge to East 55th Street, in Cleveland. The work shall suspend and resume for bridge CUY IR 490 - 01.00, over the Cuyahoga River Valley. The project will be moving from SFY 2014 to SFY 2013 and changing the limits to include the western approach from the West 11th Street Bridge, suspend work at bridge and continue work to East 55th Street. Also, the project's construction cost has increased from \$660,000 to \$1,030,000.

**GEA BELL RD (WEST): PID No. 90567** – This project is listed on page 94 of the TIP. The project involves repair and resurfacing along approximately two miles of Bell Road, from the South Russell west corporation line to east of SR-306, in South Russell Village. The project's estimated construction cost has increased from \$1,652,500 to \$3,002,800. The sponsor has requested additional STP funds to fund the federal-aid eligible portion of the project. This request must be processed through NOACA review. A determination on whether or not to grant the request will be made in March. Until a

determination is made the amount of STP funds committed to the project must remain capped at \$1,322,000. Anything over \$1,322,000 should be portrayed with local funds.

**GEA SR 87-15.89: PID No. 92571** – This project was split from GEA SR 87-19.75 SAFETY: PID No. 23733 (via a 3/16/12 technical amendment) and now has been combined with GEA SR 87-15.89: PID No. 83642, and involves resurfacing SR 87, from approximately the Middlefield Village west corporation line to the Geauga County line, in Burton Township, Middlefield Village and Middlefield Township. The project length has increased from 2.5 miles to 4.81 miles. The project's construction cost has increased from \$935,000 to \$1,592,437.

**LAK METROPARKS BIKEWAY: PID No. 80964** – This project is listed on page 105 of the TIP. The project involves constructing 10' wide multi-use path, from Greenway Ravenna Rd parking lot to the existing Greenway Girdled Road parking lot, in Concord Township. The project was advanced from the Plan to SFY 2014 of the TIP, via Resolution No.2012-049. The project includes a \$272,000 right-of-way (RW) phase, to be funded with SAFETEA-LU earmark funds and toll revenue credit that is not portrayed in the TIP. The RW phase is being added to the project for SFY 2013.

**LOR GRISWOLD RD: PID No. 79087** – This project is listed on page 129 of the TIP. The project involves widening to 3 lanes and resurfacing along Griswold Road, from Lake Avenue to Leona Street, in Elyria Township and Elyria. The project's estimated construction cost has been revised from \$3,065,370 to \$5,256,654. The increase cost is mostly attributable to sanitary work and water work being done in conjunction with the road project. The cost associated with the waterline work and other items, is estimated to be \$2,804,358. This work will be funded locally, but should be reflected in the project's total cost. The amount of STP funds committed to the project remains capped at \$2,452,296.

**LOR SR 254-00.01: PID No. 83793** – This project is listed on page 143 of the TIP. The project involves improvements at the intersection of SR 254 and West River Road, in Sheffield Township and includes installing an exclusive right-turn lane for eastbound vehicles at West River Road. The project also includes installing a two-way left turn lane on SR 254 between SR 57 and West River Rd. The sponsor reports that the estimated cost of the RW has increased from \$250,000 to \$835,000.

Attached is the technical amendment sheet portraying the projects, their respective costs and in the appropriate years.

Please incorporate this technical amendment into the STIP as well as ellis as appropriate so that funding can be accessed as needed.

Please contact me if you have any questions.
