Federal Transit Administration/
US Department of Transportation

Access and Mobility Partnership Grants

The United States Department of Transportation recently made 6.3 million dollars available for projects improving access to healthcare.

From the USDOT website: "FTA’s Access and Mobility Partnership Grants focus on transportation solutions to medical appointments and other non-emergency healthcare services. The grants will help improve options for people with limited transportation choices and bridge the gap between service providers in the transportation and health sectors."

For more information, see the links to the right.
